Re: Docket 14-150

Dear Ms. Dortch:

Below are links to YouTube copies of the video presentations made to the Bureau's staff at a meeting with them on October 13, 2015. The videos graphically depict the results of testing done on a variety of TV sets manufactured by different companies to determine how they handled the situation where a station is transmitting with a major channel number PSIP in the same area where a different station is transmitting on the same over-the-air channel as the PSIP. The results show that the non-compliant sets failed to tune the TVs to the desired station in many cases. The video corroborates the findings that PMCM TV, LLC reported in its September 11, 2015 Request for Emergency Relief.

<https://youtu.be/J4ros7E0UeI>

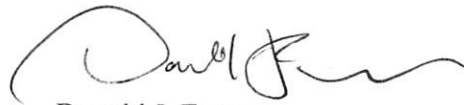

<https://youtu.be/rnSdoc2B-Nk>

Note that the second video is not narrated, but depicts the results when overlapping signals with identical major/minor number PSIPs are received by a TV receiver when the major channel is clicked on. As shown in the video, the TV receiver lists all of the PSIP channels with the major channel (in this case channel 4) and allows the viewer to decide which identified channel he or she wants to watch. There is therefore no possibility of confusion by the viewer as to which channel he or she is receiving. This result was obtained when both compliant and non-compliant TVs were tested.

Ms. Marlene Dortch, Secretary
Federal Communications Commission
